Texture Mapping

Homework Evaluation

Please evaluate the contribution of your group member for homework  
**No. 4 - Texture Mapping.**

Please use one form for each team member in your team.

Name: Shivan G and Andrew M
-----------------------------

**1. Contribution / Involvement**

How to you assess the amount of contribution of your team member. Note, only one person in your team can fulfill a lead contribution, otherwise, everybody is a major contributor.  
Select only one option:

- ☐ Lead contribution (3pt)
- ☐ Major contribution (2pt)
- ☐ Minor contribution (1pt)
- ☒ No contribution (0pt)

Please explain your decision:

Not email reply from assign grop.
-----------------------------------

Explanation:

- Select "lead contribution" if you believe this team member was the major developer who worked most on concept, code, ideas, etc. He or she was the leader in your team.
- Select "major contribution" if the homework could **not** be successfully completed without the contribution of this team member.
- Select "minor contribution" if the team member contributed to the success, but the contribution is not critical for the homework (e.g., aligned the names of all functions).
- Select "No contribution" if the team member did not contribute anything.
- Note: contributions are code contributions, discussions, working on parameters, testing, pushing code to git, organizing the meeting, etc. Do not solely consider programming as contribution.

## 2. Approachable / Interaction

Please assess how approachable your team member when preparing the homework.

Some hint that may help you to assess this:

How "easy" you could work with your team member. Was your team member open for discussion and accepted critic? Could you contact your team member via email? Did your team accepted and worked on ideas from other team member or did he/she solely followed own ideas? Does the team member is open for negotiation?

But, this does not mean that your team member must accept everything. Critic and discussion in all direction is good.

Please select one option:

- ☐ Open and approachable (3pt)
- ☐ Approachable (2pt)
- ☐ Less approachable (1pt)
- ☒ Very difficult to work with (0pt)

Please explain your decision:

Not email reply from assign group.

- Select " Open and approachable" if your team member was available, open for discussion and critic, contributed to ideas of other people, was - in general - easy to work with.
- Select "Approachable" if one of this option is correct: the team member did not discuss ideas of other people. The team member did not want to work on ideas of other people. The team member did not accept criticism. The on-campus team member could not find time to join the team work and solely worked via email or video conference (except online students - that's ok for them). It was always required to convince / push the team member to do the work.
- Select "Less approachable " if multiple of the criteria mentioned apply to this team member.
- Select "Very difficult to work with " if team work was impossible.

### 3. Quality of Work

How do you assess the quality of the team member's work?

Consider the degree to which your team member provides work that is accurate and complete.

Please select one option:

- ☐ He or she produces work that consistently exceeds established group or project requirements (the team member is better than everybody else) (3pt).
- ☐ Meets average group or project requirements (2pt).
- ☐ Occasionally produces work that meets minimum group or project requirements (1pt).
- ☒ Produces unacceptable work (0pt).

- Select " consistently exceeds established group or project requirements" if your team member's work was beyond any doubts always acceptable for the group. You did not need to correct his/her work once.
- Select " average group or project requirements " if you think that the work of your team member was equal to the work of you and everybody else.
- Select " Occasionally ...." if the work of your team member was sometimes good.
- Select " Produces unacceptable work " if you could never use any deliverable of your team member or if he or she did not deliver anything.
